EDUCATION

New York University, Tandon School of Engineering · New York, NY May 2026
Master of Science in Computer Engineering GPA: 3.7
ML Teaching Assistant, mentored 100+ graduate students on PyTorch training pipelines and model debugging.

Dr. A.P.J. Abdul Kalam Technical University · Delhi, India Jun 2024
B.Tech Computer Science and Engineering First Division with Distinction

TECHNICAL SKILLS

Languages Python · Java · TypeScript · Go · C++ · SQL
Backend FastAPI · Django · Node.js · REST · WebSockets · Redis · Celery · ARQ · SSE
Databases PostgreSQL · MySQL · MongoDB · GraphQL
Cloud/Infra Linux · AWS · Docker · Kubernetes · Terraform · Jenkins · GitHub Actions
AI/ML LLM · RAG · ONNX Runtime · vector search
Frontend React · Next.js · Tailwind

WORK EXPERIENCE

Software Engineer Intern (Backend) · Ingelt Study Abroad Sep 2023 – Aug 2024

- Shipped multi-tenant EdTech backend in Node.js for 1,000+ students across 50+ orgs, isolating tenants via Postgres row-level security and RBAC.
- Cut p95 latency from 1.2s to under 600ms by offloading uploads to S3 presigned URLs and moving transcoding and invoicing to async Celery workers.
- Reduced deployment downtime and manual operational overhead by implementing automated CI/CD pipelines with testing, build, and zero-downtime EC2 deployments.

Software Engineer Intern · Macverin Technologies · macverin.com Jul 2022 – Aug 2023

- Owned end-to-end delivery of DRF and Node APIs and Next.js and Angular frontends for 6 clients, shipping full-stack features without handoffs.
- Introduced Jenkins CI/CD with Docker for high-value clients across GCP and AWS, raising in-house margins 25% in the first year.
- Integrated Stripe, Firebase Auth, and Google Maps APIs to power payments, authentication, geospatial workflows, and dynamic pricing systems.

PROJECTS

Singularity - Multi-Agent Research Platform · singularity.hellonish.dev Mar 2026 – Present

- Built a governed LangGraph pipeline that turns ambiguous prompts into user-approved plans, runs parallel research DAGs under hard budgets, and rejects uncited reports.
- Shipped Next.js/FastAPI web and CLI clients with replayable SSE, encrypted multi-provider BYOK, rotating-token authentication, and tenant-isolated Qdrant retrieval.
- Productionized long-running jobs across Vercel, AWS, Supabase, Redis/ARQ, and Modal with restart-safe checkpoints, isolated sandboxes, and a 318-test suite.

ineedajob.pro - Agentic Career Intelligence Platform · www.ineedajob.pro Jan 2026 – May 2026

- Shipped Agentic AI platform reducing job application effort by 50%, automating research, tailored reachout strategy, followup and profile positioning supporting multiple LLM providers via BYOK, reaching 100+ users in one month.
- Built a 6-step LLM pipeline with parallel workflows streaming to the UI over WebSocket, exposing a GraphQL schema so the web app and browser extension query one Go backend for different data shapes.

Snap2Caption - MLOps Infrastructure · whitepaper Mar 2025 – May 2025

- Provisioned multi-node OpenStack infrastructure with Terraform, then configured its Kubernetes cluster using Ansible and Kubespray.
- Defined four Helm charts and five Argo Workflows for model delivery, with MLflow, MinIO, Prometheus, and Grafana providing end-to-end lifecycle visibility.
